

Helios Income Note 2007-B - Collateral Tape Extract

Collateral Tape Extract: Early Performance Review

26 February 2007

EARLY PERFORMANCE REVIEW

POOL-LEVEL TAPE EXTRACT

RATING SURVEILLANCE PENDING

1. Collateral Performance Table

Pool	Share	30-day delinquency	Refi success	Main loan type
Pool A - Prime Fixed	32%	1.1%	86%	Fixed-rate prime
Pool B - Near-prime ARM	24%	3.4%	70%	Adjustable-rate mortgage
Pool C - Second-lien	14%	5.8%	59%	Second-lien loans
Pool D - Broker ARM	18%	6.9%	58%	Low-documentation ARM
Reserve / Other	12%	n/a	n/a	Cash reserve / other

Correlation Note

Weak-pool default correlation has been revised upward from 10% to 16%; rating surveillance has not yet updated.

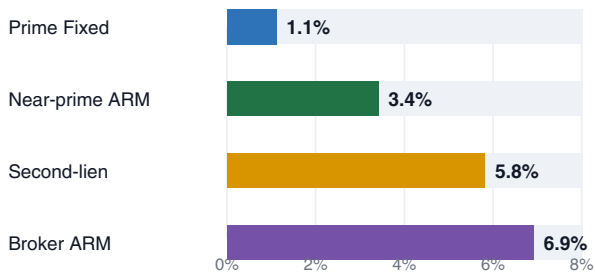

Protection Note

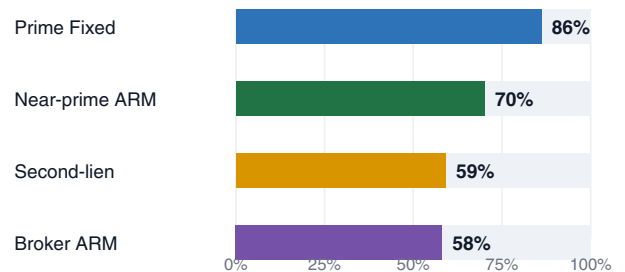

Senior tranche remains protected under base-case structure, but deterioration is concentrated in broker-originated and second-lien pools.

2. Pool Signal Charts

30-Day Delinquency by Pool

Early performance review (%)

Refinancing Success by Pool

Lower success is clustered in weaker pools (%)

Quick observations

- Deterioration clusters in second-lien and broker ARM pools.
- Refi success is weakest where delinquency is highest.
- Surveillance has not yet reflected the 10% -> 16% weak-pool correlation update.

WEAK-POOL CORR.

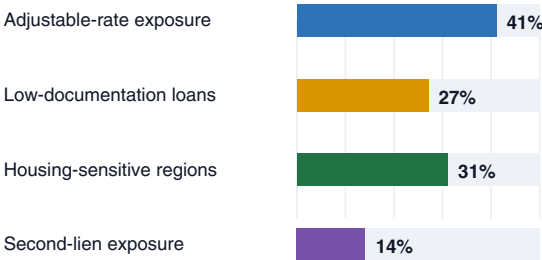

10% → 16%

Revised upward

Feature	Value
Adjustable-rate exposure	41%
Low-documentation loans	27%
Housing-sensitive regions	31%
Second-lien exposure	14%
Weak-pool default correlation	10% -> 16%

Loan Feature Profile

Selected tape flags as share of collateral pool

Tape Read-Through

The weak pools are no longer isolated one-off observations; several tape flags point to the same collateral clusters.

Review Status

Senior ratings and headline returns still appear stable, while the collateral tape is moving ahead of broader market signals.

Phase 3 Market Context

Headline YTD returns remain positive while pool-level weakness appears

Early performance memo

Early deterioration is concentrated in weaker pools before rating surveillance updates. Headline returns and senior ratings may therefore lag the underlying collateral tape.
