

Funds Beating HarborPoint — Income Strategy Comparison

Prepared for: NorthLake Pension Allocation Committee

26 February 2007

1. Peer Fund Comparison Snapshot

Fund	Structured Exposure	Financial Exposure	Cash Buffer	Repo Use	YTD Return
Atlas Pension Plus	18%	16%	5%	Limited	+11.2%
Meridian Income Fund	22%	14%	4%	Yes	+12.0%
Stonebridge Credit	31%	12%	2%	Yes	+13.8%
HarborPoint Balanced	7–12%	10–15%	Higher than peers	No / limited	+7.9%

Note: Percentages reflect approximate allocations as disclosed by managers or estimated by NorthLake.

Consultant Comment

Strongest peer returns are associated with larger structured-income allocations and lower cash balances.

Disclosure Note

Repo use and liquidity adjustment are not consistently disclosed across peer funds.

2. YTD Return Comparison

Year-to-date return (%)

3. Cash Buffer Comparison

Cash buffer as % of total assets

Key Takeaway

Peers with higher structured-income exposure, lower cash buffers and limited reliance on cash generate higher year-to-date returns.
